Overall Length:

41.000 inches

Overall Height:

6.000 inches

Overall Width:

23.000 inches

End Application:

F-111d acft

Joint Electronics Type Designation System Item Name:

Radar receiver

Joint Electronics Type Designation System Item Type Number:

R-1549/apq-130

Usage Design:

Radar set an/apq-130

Functional Description:

Processes rf, analog and digital signals; provides if beacon test and rf test to verify receiver performance; provides circuitry for antenna control and driving power, beam switching, and sensitivity time control

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T208-a
