Overall Length:

6.000 inches

Overall Height:

0.625 inches

Overall Width:

4.500 inches

Component Type And Quantity:

2 capacitor and 10 jack and 14 mounting pad and 1 printed wiring board and 12 resistor

Special Features:

Emajor components: binary, integrated circuit 8; buffer, integrated circuit 5; inverter, integrated circuit 1; semiconductor device, diode 5;

component quantity: 57; mounting method: connector, rack

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A51110
