**Overall Length:**

6.000 inches

**Overall Height:**

0.775 inches

**Overall Width:**

4.500 inches

**Component Type And Quantity:**

2 capacitor and 13 jack and 15 mounting pad and 1 printed wiring board and 30 resistor

**Special Features:**

Major components: binary, integrated circuit 8; buffer, integrated circuit 4; line driver, integrated circuit 2; multivibrator, integrated circuit 1; semiconductor device, diode 5; component quantity: 81; mounting method: connector, rack

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A511I0
