Overall Length:

6.000 inches

Overall Height:

0.775 inches

Overall Width:

4.500 inches

Component Type And Quantity:

2 capacitor and 13 jack and 15 mounting pad and 1 printed wiring board and 30 resistor

Special Features:

Major components: binary, integrated circuit 8; buffer, integrated circuit 4; line driver, integrated circuit 2; multivibrator, integrated circuit 1; semiconductor device, diode 5; component quantity: 81; mounting method: connector, rack

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511I0
