Overall Length:

5.650 inches

Overall Height:

0.647 inches

Overall Width:

4.750 inches

End Application:

Detecting-ranging set subassembly, sonar

Component Type And Quantity:

1 printed wiring board

Special Features:

Capacitor, diode, resistor, relay, transistor, transformer; mounting method: connector and rack; component quantity: 51; fsc application data: detecting ranging sets, sonar

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A5110
