Overall Length:

5.650 inches

Overall Height:

1.017 inches

Overall Width:

4.830 inches

End Application:

Detecting-ranging set subassembly, sonar

Component Type And Quantity:

1 printed wiring board

Special Features:

Capacitor, diode, reactor transistor, resistor; mounting method: connector and rack; component quantity: 27; fsc application data: detecting ranging sets, sonar

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A5110
