Overall Length:

4.340 inches

Overall Height:

2.120 inches

Overall Width:

3.400 inches

Component Type And Quantity:

1 capacitor and 1 chassis and 1 coil and 1 nut and 1 resistor and 1 screw and 1 transformer and 1 transistor and 1 washer

Special Features:

Major components: terminal stud 1; component quantity: 27; mounting method and configuration: four 0.173 inch diameter mounting holes on 1.380 by 2.180 inch mounting center

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511I0
