Joint Electronics Type Designation System Item Type Number:
An/ssq-77a
Electrical Power Source Relationship:
Self-contained
Design Type:
Directional
Unpackaged Unit Weight:
25.400 pounds
Electromagnetic Wave Receiving Frequency:
Between 136.0 megahertz and 173.5 megahertz
Special Features:
Detects acoustal energy of submarines, selectable 99 channels, launch envelope f, helicopter compatible parachute, 1, 4 or 8 hour life, 1,
000 ft operating depth
Reference Number Differentiating Characteristics:
As differentiated by operating life
Shelf Life:
N/a
Unit Of Measure:
-
Demilitarization:
Yes - demil/mli
Filg:
