Overall Height:

100.0 millimeters

Overall Width:

88.0 millimeters

Frequency Rating:

50.0 kilohertz and 200.0 kilohertz

End Application:

Center console and trailered boats

Usage Design:

Compensate for hull deadrise

Unit Type:

Ceramic

Unpackaged Unit Weight:

3.0 pounds

Product Name:

600 w tilted element, through hull transducer

Special Features:

Dual frequency; built in deadrise compensation; fixed 20 degree tilted version for 16 to 24 degree hull deadrise; low profile protrusion below the hull; bronze or stainless steel housing available; built in temperature sensor; boat size up to 8 m

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T212-a
