Special Features:

5.000 in. Lg; 2.750 in. D; 1.750 lbs (w/o lens); battery life: 50 hrs; type: 25mm high performance microchannel plate intensifier w/automatic brightness control; resolution: 28-35 line-pairs per mm; spectral resp: visible to infrared, 500-900nm; allows to view in almost complete darkness, high gain, high resolution, low blooming, ruggedized, lightweight design, low-light level fluorescence detection; couples easily to slr & video cameras for recording of low-light events; astrophotography.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
