End Application:

An/usq-13 (v)

Special Features:

Hand held thermal imager convertselectromagnetic thermal energy radiated from an object into electronic video signals. Signals are amplified & transmitted to the video processing part of the sight where the signals are further amplified & the resultant image is displayed on the cathode ray tube, or via an interconnecting cable to a monitor unit or recorded on a vcr; provides nighttime observation

Functional Description:

Item is a battery powered, manportable thermal imaging system. It uses a linear array of detector elements & electromechanical scanning to provide a real time tv video output

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A23800
