Overall Height:

2.100 inches

Overall Width:

4.100 inches

End Application:

An/peq-10

Functional Description:

The laser aiming module (lam) 1000 system is a single, integrated device used to acquire and engage targets during limited visibility conditions or in total darkness. The system will mount on the m9/m11 pistol and provide the capability to employ white light illuminating, stand-alone aiming lasers/pointers (visible and infrared), and infrared illumination functions in a single, small, lightweight, integrated device.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
