General Description:

Supplies data in analog form; power output 115 vac 50/60 hz; 13.000 in lg; 8.000 in w; 10.000 in h; wt 13.5 lb; reliably measures photon-induced charges or currents as low as 1.00×10 to the 11th power coulombs; ambient compensation system to measure both energy and power; pin jacks for connection to flash trigger system; dynamic measurement range over full spectrum of light intensity

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
