Reflective Backing Material:

Aluminum alloy

Reflection Reducing Surface:

One

Beveled Edge Location And Quantity:

2 circumference

Special Features:

Circumference 25.0mm, thickness 6.0mm, dimension tolerance +/-0.25mm, material: low expansion borosilicate glass (lebg) or synthetic fused silica, complies with mil-c-675 and mil-m-13508

Material:

Glass, borosilicate

Material:

Glass, borosilicate

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T271-f
