**End Application:**

An/mvy-502

**Component Document Origin:**

Industrial

**Document Source:**

13160

**Document Type:**

Technical order

**End Item Source:**

80058

**End Item Name:**

Sight unit, gunner

**Special Features:**

9operating power requirements: 28 volts, 15 amps (start) 4 amps (run max), dimension, length 15 in., height 15 in., width 20 in., weight approx 60 lbs, modular design allows retrofit into the passive elbow channel of most armored vehicle sight system

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A23800
