End Application:

An/mvy-502

Component Document Origin:

Industrial

Document Source:

13160

Document Type:

Technical order

End Item Source:

80058

End Item Name:

Sight unit, gunner

Special Features:

9operating power requirements: 28 volts, 15 amps (start) 4 amps (run max), dimension, length 15 in., height 15 in., width 20 in., weight approx 60 lbs, modular design allows retrofit into the passive elbow channel of most armored vehicle sight system

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
