Fragility Factor:
Moderately rugged
Accessory Components And Quantity:
Rod clamp
Voltage In Volts And Current Type:
9.0 dc
Product Name:
Laser dectector
Special Features:
Heavy duty rod clamp; seven display channels
Functional Description:
Used to locate laser beam in bright light or over long distances; can be used with any rotating visible or invisible laser
Supplementary Features:
Powered by 1-9 volt battery; alsoincludes cordura bag
General Description:
Speaker volume-off/medium/high;sensitivity-fine/medium/coarse; lcd display-front and back
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A23900
