Special Features:

The handheld laser marker (hlm) la-10/u is a lightweight, short-range laser marker for laser handoff missions. The hlm is equipped with a daytime visible laser that is aligned with 1064nm laser output. The hlm can be worn on the body (in a pouch or holster). The hlm is able to perform when power is provided by a single battery pack or power cable. The hlm consists of the following components: laser marker, power cable, battery pack, operator's manual, operations pouch/holster, and transportation carrying case
