**Overall Length:**

7.125 inches

**Overall Height:**

1.250 inches

**Overall Width:**

5.000 inches

**End Application:**

Receiver subassembly

**Component Type And Quantity:**

1 printed wiring board and 40 capacitor and 1 connector and 19 inductor and 1 microcircuit and 38 resistor and 7 transistor

**Special Features:**

Crystal filter 1; mounting method: screw; component quantity: 155; fsc application data: radio set, navigation, nonairborne

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A51110
