End Application:

An/alr-56m

Criticality Code Justification:

Feat

Component Type And Quantity:

1 harness and 2 oscillator and 1 coupler and 2 generator and 79 screw and 24 washer and 1 standoff and 1 switch and 1 dummy load and 1 attenuator and 1 plate and 8 post and 2 lug and 1 support and 3 clamp and 1 bracket and 16 nut and 1 chassis

Special Features:

Drawing name: rf module assembly, a1, lru-7; subassembly of the superhetrodyne receiver; also c/o preselector mod 1, cable assembly 15, shelf assembly 1; elect rostatic sensitive device

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A5110
