Overall Depth:

7.500 inches

Overall Height:

7.500 inches

Overall Width:

19.500 inches

End Application:

An/alq-212

Joint Electronics Type Designation System Item Name:

Receiver, countermeasures

Joint Electronics Type Designation System Item Type Number:

R-2639/alq-21 (v)

Functional Description:

Wthe receiver, countermeasure conditions power and generates timing signals for the transmitter, laser. It interfaces with the host for power and signals and passes power and signal to the transmitter, laser. It accepts 3 phase, 115 vac, 400 hz prime power per mil-std-704. It interfaces to the host (j2) using bi-directional asynchronous communications for command and status monitoring. It accepts one modulation input. It performs autonomous continuous built-in-test. It is air cooled

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
