Overall Length:

8.500 inches

Overall Height:

20.000 inches

Overall Width:

14.000 inches

End Application:

An/alq-211

Functional Description:

The receiver-processor subsystem-portion of an integrated electronic set composed of receivers, processors and modulators specifically designed to provide facilities for intercepting, analyzing and countering electromagnetic energy propagated by radar directed weapon systems and to provide warning and electronic countermeasures (ecm). The unit is designed to interface with other aircraft systems and sensors to provide countermeasures management situational awareness and a pilot-vehicle interface for each particular aircraft on which it is installed.

Material:

Aluminum and steel

Precious Material:

Gold

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A23900
