Special Features:

Submarine countermeasure acoustic device 102 (scad 102) is a quick reaction torpedo countermeasure for the astute, swiftsure, trafalgar and vanguard class submarine. The scad 102 interfaces with and is launched from the mk6, mk8, and mk10 submarine signal ejectors on the host platforms. After launch, the device executes its pre-programmed acoustic mission prior to scuttling to the ocean bottom
