End Application:

Atircm qrc

Unpackaged Unit Width:

74.140 inches

Unpackaged Unit Height:

76.700 inches

Product Name:

Laser infrared device

Special Features:

Laser infrared devices is a portion of an/alq-21 (v) that generates multiple bands laser to countermeasure various heat seeking missiles. The other portion of the an/alq-212(v) is the an/aar-57(v) warning receiver systems, countermeasure. Therefore, an/alq-212(v) is capable of dispensing flares and chaffs and it also has laser capability to defeat various heat seeking missiles. Operating power requirements: a. 115 vac, 400hz, 3 phase b. 28 vdc, 68 amps; weight: 164.8; height: 76.7 in; depth: 72.2 in; width: 74.14 in

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23800
