NSN 5895-00-001-6626

Radio Frequency Tuner - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5895-00-001-6626

Overall Length:
6.500 inches
Overall Height:
2.000 inches
Overall Width:
3.953 inches
Basic Shape Style:
Rectangular or square
Inclosure Type:
Open
Installation Design:
Module
Circuit Construction Type:
Solid state
Connection Type And Location:
Receptacle, audio top
• •
Receptacle, audio top
Receptacle, audio top External Dc Operating Voltage In Volts:
Receptacle, audio top External Dc Operating Voltage In Volts: 12.0 single voltage
Receptacle, audio top External Dc Operating Voltage In Volts: 12.0 single voltage Fsc Application Data:
Receptacle, audio top External Dc Operating Voltage In Volts: 12.0 single voltage Fsc Application Data: Receiver, countermeasures
Receptacle, audio top External Dc Operating Voltage In Volts: 12.0 single voltage Fsc Application Data: Receiver, countermeasures Shelf Life:
Receptacle, audio top External Dc Operating Voltage In Volts: 12.0 single voltage Fsc Application Data: Receiver, countermeasures Shelf Life: N/a
Receptacle, audio top External Dc Operating Voltage In Volts: 12.0 single voltage Fsc Application Data: Receiver, countermeasures Shelf Life: N/a Unit Of Measure:
Receptacle, audio top External Dc Operating Voltage In Volts: 12.0 single voltage Fsc Application Data: Receiver, countermeasures Shelf Life: N/a Unit Of Measure:
Receptacle, audio top External Dc Operating Voltage In Volts: 12.0 single voltage Fsc Application Data: Receiver, countermeasures Shelf Life: N/a Unit Of Measure: Demilitarization:
Receptacle, audio top External Dc Operating Voltage In Volts: 12.0 single voltage Fsc Application Data: Receiver, countermeasures Shelf Life: N/a Unit Of Measure: Demilitarization: Yes - demil/mli
