Inclosure Material:

Copper

Overall Length:

2.125 inches

Overall Height:

8.062 inches

Overall Width:

4.000 inches

Frequency Rating:

Between 4.30 gigahertz and 6.35 gigahertz

Inner Surface Material:

Silver

Power Takeoff Method:

Power take-off from coupling to coaxial connector

Tuning Facility:

Provided

Fsc Application Data:

Tuner, radar identification and recognition equipment airborne

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T213-c
