**Inclosure Material:**

Copper

**Overall Length:**

2.125 inches

**Overall Height:**

8.062 inches

**Overall Width:**

4.000 inches

**Frequency Rating:**

Between 4.30 gigahertz and 6.35 gigahertz

**Inner Surface Material:**

Silver

**Power Takeoff Method:**

Power take-off from coupling to coaxial connector

**Tuning Facility:**

Provided

**Fsc Application Data:**

Tuner, radar identification and recognition equipment airborne

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

T213-c
