Overall Length:

3.500 inches

Overall Height:

2.125 inches

Overall Width:

1.313 inches

Basic Shape Style:

Rectangular or square

Inclosure Type:

Open

Installation Design:

Mechanical

Circuit Construction Type:

Solid state

Frequency Per Channel:

1030.0 kilohertz 1st operating channel

Impedance Rating Per Channel:

50.000 ohms input channel

External Dc Operating Voltage In Volts:

13.0 single voltage

Fsc Application Data:

Radio set, radio, navigation airborne

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
