Overall Length:

7.500 inches

Overall Height:

11.125 inches

Overall Width:

8.000 inches

Ac Voltage Rating:

120.0 volts

Dc Voltage Rating:

6.0 volts

Frequency Rating:

400.0 hertz

Joint Electronics Type Designation System Item Name:

Amplifier-power supply

Joint Electronics Type Designation System Item Type Number:

Am-6296/tps-32

Electrical Power Source Relationship:

Operating

Internal Battery Accommodation:

Not included

Power Supply Output Voltage Rating:

8.0 kilovolts

Power Supply Output Current Type:

Ac/dc

Power Supply Output Current Rating:

1.2 milliamperes

Amplifier Name:

Video and squelch amplifiers

Amplifier Power Output Rating:

800.0 milliwatts

Amplifier Output Impedance Rating:

112.0 ohms

Phase:

Single

Fsc Application Data:

Radar, nonairborne, except fire control and guided missiles

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T213-a
