Overall Length:

6.840 inches

Overall Width:

4.500 inches

End Application:

Electrical synchronizer subassembly

Component Type And Quantity:

1 printed wiring board

Special Features:

Hcapacitor, coil, connector, crystal, divider, diode, housing, microcircuit, resistor, transistor; component qty: 127; mounting configuration: connector mtd; fsc application data: synchronizer-exciter, radar, airborne

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511I0
