General Description:

Output signal, 5, 6, 7, or 8 bit teleprinter code with a 1, 1.5 or 2 unit stop bit, message format, any arrangement of 5, 6, 7, or 8 bit teleprinter characters, message length up to 80 characters, output rate, any rate from 37.5 baud to 1200 baud high level, and up to 4800 baud polar logic level, output circuit, low level polar signals to eta standard rs-232-3, optional high level dry contacts of a neutral/polar keyer suitable for use with up to 60 ma/130 vdc loops, output impedance, low level, 1k ohm, optional high level, less than 100 ohms, oper pwr req, 115/230 vac, 50 or 60 hz, 10 w, 19.000 in. W, 1.750 in. H, 18.000 in. Deep, rack mtd

Fsc Application Data:

Communication group, oa/8727-tsc/84

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
