Overall Length:

6.735 inches

Overall Height:

2.960 inches

Overall Width:

1.960 inches

Component Type And Quantity:

1 printed wiring board and 1 capacitor and 1 coil and 1 transistor and 1 resistor and 1 connector and 1 cable

Special Features:

Mounting method: holes for screws; component type and quantity: varactor 1, integrated circuit 1; component quantity: 154; mounting configuration: four 6-32 thd screws spaced on 1.250 in. By 6.330 in. Mtg centers; fsc application data: transmitting set radio electronic identification

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A51110
