Overall Length:

6.500 inches

Overall Height:

1.000 inches

Overall Width:

2.500 inches

Special Features:

Major components: electron tube 6; usage design: provides variable delay in trigger to main line and sweep generator; mounting method: attaches to studs and retained by snapslide fasteners

Specification Data:

80058-mx-1517/apn58 professional/industrial association specification

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A51110
