Overall Length:

6.250 inches

Overall Height:

3.250 inches

Overall Width:

5.125 inches

Component Type And Quantity:

1 switch and 1 resistor and 1 counter

Special Features:

Mounting method: bolt; component quantity: 3; usage design: used to control the north south off centering of the displa (north, south manual off centering control assembly) ; mounting configuration: three no. 10-24 tapped mtg holes irregularly spaced on triangle; fsc application data: indicator, azimuth and range radar search equipment except airborne

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A51110
