Overall Length:

3.750 inches

Overall Height:

0.531 inches

Overall Width:

3.031 inches

End Application:

Type no. T-721/tsq-36

Component Type And Quantity:

1 printed wiring board and 17 resistor

Special Features:

Pmajor components: semiconductor device, diode 50; mounting method & configuration: plug-in mount; jetds name & type: transmitter unit subassembly, mx-2688/6; usage design: time slot gate logic circuit; marked: 't/r'

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A5110
