General Description:

Used as input and output terminations for line measurement with ability to match different impedances and if attenuating the signal received with 110 db pad, attenuator 110 db in 1 db steps, dc to 10 mhz, input frequency range, 50 hz to 560 khz, impedance 135, 600, 900 ohms and bridging 10 khz center tapped, output frequency range, 50 hz to 560 khz, impedance 135, 600, 900 ohms, o/a dim. 8 in. Lg by 5-1/8 in. W by 6-3/32 in. Deep

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
