Overall Length:

9.000 inches

Overall Height:

2.000 inches

Overall Width:

7.000 inches

Component Type And Quantity:

9 capacitor and 5 diode and 2 relay and 22 resistor and 1 transformer and 6 transistor

Special Features:

Mounting method: connector; component quantity: 45; fsc application data: electrical synchronizer subassembly, radar, airborne, except fire control and guided missile

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511I0
