**Overall Length:**

6.120 inches

**Overall Height:**

0.640 inches

**Overall Width:**

2.500 inches

**Component Type And Quantity:**

2 capacitor and 3 crystal and 3 relay and 3 resistor and 1 board

**Special Features:**

Emounting method: bolt and chassis; component quantity: 12; mounting configuration: tyree 0.150 in. Mtg holes irregularly spaced; fsc application data: synchronizer, electrical, aircraft gunnery fire control

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A511I0
