Overall Length:

6.120 inches

Overall Height:

0.640 inches

Overall Width:

2.500 inches

Component Type And Quantity:

2 capacitor and 3 crystal and 3 relay and 3 resistor and 1 board

Special Features:

Emounting method: bolt and chassis; component quantity: 12; mounting configuration: tyree 0.150 in. Mtg holes irregularly spaced; fsc application data: synchronizer, electrical, aircraft gunnery fire control

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511I0
