Overall Length:

5.000 inches

Overall Height:

1.000 inches

Overall Width:

4.375 inches

Component Type And Quantity:

2 bracket and 3 capacitor and 1 connector and 3 diode and 1 relay and 8 resistor

Special Features:

Vplugs in holder and retained by 2 turnlock fasteners spaced 4.312 in. C to c; printed circuit board 1; retainer tube 1; test point 2; electron tube 1; indicators, azimuth and range, radar, nonairborne exc. Fire control and guided missile

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511I0
