Dc Voltage Rating:

320.0 volts

Usage Design:

Controls frequency of radio set

Internal Battery Accommodation:

Not included

Input Signal Quantity:

1

Monitoring Method:

Aural

Input Signal Frequency Rating:

Not rated

Input Signal Type:

Sawtooth sweep voltage

Special Features:

Differs from the c-1256/arc-34 in. That connectors are relocated, voltages are brought in on different pins and parts with increased reliability are utilized

Fsc Application Data:

Radio set, communication airborne

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T121-a
