Overall Length:

2.110 inches

Overall Height:

1.250 inches

Overall Width:

1.870 inches

Vibration Resistance Range In Hertz:

+50.0/+2000.0

Shock Resistance Rating In Gravitational Units:

100.0

Operating Temperature Range:

-54.0/+70.0 degrees celsius

Average Life Measurement:

Not rated

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Installation Design:

Mechanical

Circuit Construction Type:

Solid state

Frequency Per Channel:

5.0 kilohertz input channel

Signal Voltage Rating Per Channel:

5.000 millivolts input

Signal Data Type Per Channel:

Input channel discrete voltage

Shock Pulse Duration Time:

6.0 milliseconds

Connection Type And Location:

Wire lead terminals left side

External Dc Operating Voltage In Volts:

28.0 single voltage

Fsc Application Data:

Test central airborne weapon system, automatic

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
