Overall Length:

7.281 inches

Overall Height:

0.938 inches

Overall Width:

5.062 inches

End Application:

Td-204/u

Component Type And Quantity:

25 capacitor and 9 conductor and 1 connector and 4 dissipator and 1 guide and 6 jack and 14 mount and 2 pin and 1 printed wiring board and 1 relay and 36 resistor and 2 strap and 8 semiconductor and 1 switch and 14 transistor and 3 transformer

Special Features:

Usage design: used as p/o a receiver and pluse generator circuit; mounting configuration: plugs into and mtd by printer ckt bd rack

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A5110
