Overall Length:

10.625 inches

Overall Height:

3.375 inches

Overall Width:

3.500 inches

Component Type And Quantity:

31 capacitor and 13 semiconductor and 13 diode and 80 resistor and 17 tube and 4 relay and 3 cover and 1 chassis

Special Features:

Mounting method: screws; component quantity: 150; mounting configuration: 4 captive screws on 1.312 in. By 9.812 in. Mtg centers; fsc application data: radar set, fire control and guided missile

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A51110
