Overall Length:

8.960 inches

Overall Height:

0.860 inches

Overall Width:

3.920 inches

End Application:

Receiver-transmitter, radio, electronic identification, airborne

Component Type And Quantity:

39 capacitor and 5 choke and 1 printed wiring board and 37 resistor

Special Features:

Five no. 6/0.138 in./-32 diameter holes irregularly spaced; mtg method-screw and chassis

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A51110
