Average Life Measurement:

Not rated

End Application:

An/apr-1 (v)

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Installation Design:

Module

Circuit Construction Type:

Solid state

Supplementary Features:

Dwg name: converter frequency cv-696/apr-17; c/o lever assembly 1, dual camassy 1, if preamp assembly 1, coupling assembly 1, follower assembly 1, power supply dc filament 1, pivot assembly 1, front panel assembly 1, dust cover 1, servo drive assembly 1, base frame assembly 1, main harness 1, jack tip 2, indicator 1, shaft 1, cable assembly 4, carriage assembly 1, preselector and local oscillator assembly 1, low pass filter 1, high pass filter 1, and miscellaneous hardware

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
