Overall Length:

14.188 inches

Overall Height:

7.844 inches

Overall Width:

2.406 inches

End Application:

C-130

Power Supply Output Current Type:

Ac or dc

Special Features:

Consists of amplifier rack that contains the pwr supp circuitry & provides mounting for the amp subassy 1a2, eca 1a1, 1a3 & 1a (u/o 2589226-1 only) and amplifier servo mechanism 1a5. The amp rack front panel includes sys test pts, a compass swing switch, and a ver resistor(u/o 2589226-1 only) ; component of the c-12 gyroscopic compass sys

Reference Data And Literature:

To 5n2-4-2-4

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T213-a
