General Description:

Gear ratio 677 to 1, survival torque 387.000 in-lb at output pinion, motor shaft speed 1750 rpm max, operating temp range m50 to p135 degrees f

Fsc Application Data:

Communication-telemetry-tracking systems, nonairborne

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
