**General Description:**

Gear ratio 280 to 1, survival torque 160.000 in-lb at output pinion, motor shaft speed 1750 rpm max, operating temp range m25 to p125 degrees f

**Fsc Application Data:**

Communication-telemetry-tracking systems, nonairborne

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli
