General Description:

Gear ratio 280 to 1, survival torque 160.000 in-lb at output pinion, motor shaft speed 1750 rpm max, operating temp range m25 to p125 degrees f

Fsc Application Data:

Communication-telemetry-tracking systems, nonairborne

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
